PUBLIC AMUSEMENTS.

Escape of

Power

How the right oil saves fuel

The only thing that sends the power through he online is the gas explosion. If the combustion chamber is sealed tight the exposion acts with full force on the piston head.

but unless the combustion chamber is kept fully sealed, part of each explosion escapes, a result is weakened power and wasted petrol.

Thousands of motors waste power with every ston stroke—simply because the lubricating if does not properly seal the piston rings. Compression is lost. Part of each explosion scapes past the piston rings.

This power-loss means waste of petrol on level sads, and lessened power on hills.

In the Chart to the right you will find the correct rade of Gargoyle Mobiloils for your motor, If your vehicle is not listed, a copy of our complete Chart will be sent you on request.
